

nachtblau medialoopster & Archiware P5 Archive

Media Asset Management and Archiving – Made in Germany

Available as an All-in-One Solution

The combination of MAM systems and archives brings many advantages. With mediabox, you can also use perfectly coordinated storage and your own AI services. All in all, an optimal combination to bring your video production to a new level. Archiware P5 Archive can be directly integrated into the medialoopster MAM system. Advantages like efficient storage usage and long-term backup are combined with fast video workflows and connection to AI services.

medialoopster is an easy-to-use platform facilitating the management of video assets. All workflows are efficiently managed and supported – from material acquisition, research, processing, delivery and archiving, to the analysis of existing assets using artificial intelligence (e.g. face recognition).

The integration of medialoopster and Archiware P5 Archive radically simplifies Archiving. The user can trigger the archiving of assets directly within the medialoopster user interface or define automated routines for this. P5 Archive automatically migrates data into the Archive and removes archived files from the production storage either directly or at specified times. As a result, storage capacity is efficiently used and no longer needs to be expanded.

Archived assets are secured on LTO tapes, which are optimal for long-term storage. Providing the most cost-effective storage per TB, LTO tapes are used by banks, insurance companies and businesses worldwide.

The direct integration of medialoopster and P5 Archive enables a seamless transfer of video material from the MAM system to the Archive. As a result, valuable assets, which are no longer in use can effectively be secured.

Advantages of the medialoopster/P5 solution:

- ✓ Archive and restore directly in the user interface
- ✓ Simple search-ability, visibility and retrieval of media assets
- ✓ Manual and automatic archiving
- ✓ Archiving of metadata
- ✓ Effective use of storage capacity
- ✓ Professional long-term storage on LTO tape
- ✓ Tape duplication for offsite storage
- ✓ Parallelization for optimal performance
- ✓ Supported on Mac, Windows, iOS, Web or Cloud
- ✓ Compatibility with all tape manufacturers
